PROFILE

Oriented web developer with a passion for creating responsive web applications in React. Proficient in JavaScript, React, HTML, CSS, jQuery, and experienced in utilizing Bootstrap and Ant Design frameworks. Strong background in computer science engineering with a diploma in the field. Committed to staying up-to-date with emerging technologies and continuously expanding skill set. Excels in collaborative environments and thrives on learning and implementing new concepts. Seeking opportunities to contribute expertise in front-end development while working in a supportive and balanced work environment.

WORK EXPERIENCE

Front-end Developer

Collaberus Technologies Pvt. Ltd.

2022 - currently working

- Currently serving as a Web Developer and Front-End Developer at Collaberus Technologies Pvt. Ltd., specializing in the development and design of web applications and websites.
- Utilizing a wide range of web technologies, including React, WebRTC libraries, and various design tools, to create engaging and user-friendly interfaces.
- Proficient in problem-solving and debugging, adept at identifying and resolving technical issues to ensure seamless functionality and optimal user experience.
- Managing multiple projects simultaneously, including the development of web apps and websites, while adhering to project timelines and deliverables.
- Implementing version control systems, specifically Git and GitLab, to effectively manage and track code changes, ensuring efficient collaboration with the development team.
- Working closely with backend services built on Django, effectively communicating and integrating APIs to ensure seamless data flow and functionality.
- Collaborating with cross-functional teams, including designers and backend developers, to translate project requirements into visually appealing and functional front-end solutions.

Technical Associate

Drishti IAS (Mukherjee Nagar)

2021-2022

- Served as a Technical Associate at Drishti IAS Coaching Institute, providing technical support to students and handling their technical issues throughout their learning journey.
- Demonstrated exceptional problem-solving skills by efficiently resolving a diverse range of technical problems faced by students, ensuring uninterrupted learning experiences.
- Developed a deep understanding of the IT and technical operations of a large-scale organization, gaining valuable insights into the management of complex technical infrastructures.
- Collaborated with the development team to enhance the front-end of the institute's main website, ensuring an optimal user experience and implementing user-friendly design elements.
- Actively contributed to the creation and implementation of new programs, working on the development of innovative features and functionalities to enhance the institute's offerings.
- Demonstrated adaptability and the ability to learn quickly in a fast-paced environment, staying up-to-date with emerging technologies and incorporating them into daily operations.
- Efficiently managed multiple tasks and priorities, ensuring timely completion of projects and delivering high-quality work within deadlines.

PROJECTS

IVR Tree Designer

https://github.com/SurinderSing/IVR_tree_designer

- Developed and created IVR Tree Designer project using React Flow library.
- The project allows users to create and design tree-like call flows for Interactive Voice Response (IVR) systems.
- With the IVR Tree Designer, users can easily visualize and construct the flow of IVR call interactions.
- The user interface is designed to be intuitive and user-friendly, making it easy for users to understand and navigate the flow creation process.
- Demonstrated ability to leverage React Flow library to develop practical and accessible solutions.

MyCreditIndia (Fully Responsive Website)

<https://github.com/SurinderSing/mycreditindia>

- Independently developed the entire website UI using vanilla JavaScript, HTML5, and CSS3, showcasing strong front-end development skills.
- Implemented contact forms with comprehensive validations, ensuring accurate and secure user input.
- Created multiple pages with cohesive navigation, offering a seamless browsing experience for users.
- Developed an interactive and responsive design, adapting smoothly to various screen sizes and devices.
- Demonstrated the ability to create real-life projects with practical functionality and user-friendly features.

Admin Dashboard (Using React.js)

<https://github.com/SurinderSing/adminDashboard>

- Developed a dynamic Admin Panel Dashboard UI using React.
 - Successfully implemented CRUD (Create, Read, Update, Delete) operations to manage and represent JSON data within the dashboard.
 - Enhanced the functionality of the dashboard by incorporating additional features, such as pagination, to improve user experience and data handling.
 - Demonstrated strong problem-solving skills by efficiently handling complex data manipulation and ensuring data integrity throughout the CRUD operations.
 - Created an intuitive and visually appealing user interface, optimizing usability and navigation for effective management of the admin panel.
-
